01 Mercedes-Benz Bluetooth® (SAP¹) telephone module²

Experience a new dimension of web access, telephony and navigation support – with the combination of the Mercedes-Benz Bluetooth® (SAP) telephone module and your COMAND Online multimedia system. You can simultaneously talk on the phone, use Mercedes-Benz Apps and have your text messages read aloud. The telephone module ensures that COMAND Online has a fast, stable and reliable internet connection via the integral UMTS module and the direct link to the vehicle's external aerial.

The module is compatible with all COMAND systems from NTG4.5. From NTG5 you even have access to high-speed internet: the data transfer speed via the USB cable is up to 7x faster than a Bluetooth® connection!

The telephone module can be used as a permanently installed telephone and as a data modem. The module's gateway functionality allows parallel phone use – with all the functions of Convenience Telephony (Code 386): convenient operation via your multimedia system, hands-free functionality using the personal contact details on your mobile's SIM card and much more besides. The Bluetooth® (SAP) telephone module can either use your mobile's SIM card or a SIM card can be inserted directly into the module, for a connection that is independent of your mobile phone. Many mobile phone providers offer multi SIM cards for your existing contract.

1 SAP (SIM Access Profile) allows the module to read your mobile phone's SIM card.

2 Only in conjunction with Convenience Telephony (Code 386). For further information about the telephone module, software updates and a list of supported mobiles, go to www.mercedes-benz.com/connect and select Convenience Telephony.
